

Wrist Bands

Stretch Wrist Bands

Our unique band material is manufactured using a patented crochet process. This Crochet Band is popular because it is comfortably soft and light, yet durable and reliable. The band has total insulation on the outside for maximum protection. The inside of the band is lined with a special yarn that is coated in silver to provide superior conductivity and is constructed to “float” on the underside of the band to offer maximum contact with the skin. All adjustable bands are made to fit any size wrist. Buckles are made with static dissipative nylon material.

- 3 mm stud with 360° swivel
- anti-allergic backplate
- Meet or exceed IEC 61340-5-1, MIL HDBK 263B, MIL STD 1686B and ANSI/ESD-S1.1-2006

Item No.	Colour	Circumference	Version
1601043	grey	145 mm	stretch
1601042	dark blue	adjustable	stretch

Ergo Wrist Bands

All our metal bands are made of jewelry-grade expandable stainless steel. The bands are insulated with a triple-layer oven-baked coating, similar to that used in the automobile industry. All models of metal bands come with our patented “X-tenders” which smartly-designed inter-connectable plastic links are enabling the user to adjust or expand the strap to any wrist size by using one or more of the 5 pieces provided. This renders the metal band extremely comfortable and eliminates the need to stock up on different sizes.

- 3 mm stud with 360° swivel
- Easily adjustable from 130-170 mm using one or more of the five 10 mm nylon expansion links
- Meet or exceed IEC 61340-5-1, MIL HDBK 263B, MIL STD 1686B and ANSI/ESD-S1.1-2006
